

OVERVIEW

Our investment philosophy is a fundamental, bottom-up approach to constructing portfolios coupled with a belief that markets tend to be mean reverting over the long-term. We seek to construct high quality, diversified, duration neutral portfolios by identifying the best risk/reward opportunities with a focus on lowering downside volatility.

<p>Seasoned Team & Narrow Market Focus</p> <ul style="list-style-type: none"> PMs have an average of 22 years industry experience and 11 years at Jennison Only invest in investment grade markets 	<p>Differentiated Investment Approach</p> <ul style="list-style-type: none"> Valuation driven approach Alpha historically driven by sector and security selection coupled with active yield curve management 	<p>Deep Focus on Client Relationships</p> <ul style="list-style-type: none"> Average client relationship is 20 years PMs are the main contact for clients, and we strive to develop deep relationships and customized solutions

Sources: Jennison Associates LLC and Bloomberg®. Periods over one year are annualized. Past performance does not guarantee future results. See disclosures for important information. Gross of fee performance is presented before custodial and Jennison's actual advisory fees but after transaction costs. Net of fee performance is presented net of Jennison's actual advisory fees and transactions costs. Performance results are calculated in US dollars and reflect reinvestment of income and other earnings. Please visit <https://www.jennison.com/global/en/institutional/gips/gips-active-long-credit-composite> for the Active Long Credit Composite presentation, which includes fee information and criteria for composite performance creation.

There is no guarantee our objectives will be met. The strategy may vary significantly from the benchmark in several ways including, but not limited to, sector and issuer weightings, portfolio characteristics, and security types. Diversification does not protect an investor from market risk and does not ensure a profit or guarantee against a loss.

For Professional Investors only. All investments involve risk, including the possible loss of capital. Not for use with the public. Not for redistribution.

DISCLOSURES

All data is as of March 31, 2026, unless otherwise noted. Due to rounding, individual values may not sum to total shown.

For informational purposes only and not for redistribution. This information is not intended as investment advice and is not a recommendation about managing or investing assets. Jennison makes no representations regarding the suitability of any securities, financial instruments or strategies described herein. In providing this information, Jennison is not acting as your fiduciary. This information does not purport to provide any legal, tax or accounting advice.

The information contained in this document is directed only to qualified professionals and eligible institutional investors. Distribution of this information to any person other than the person to whom this presentation has been originally delivered, and to such person's advisers, is not permitted. Any reproduction of these materials, in whole or in part, or the disclosure or redistribution of any of its contents, without the prior written consent of Jennison, is prohibited. These materials may contain confidential information and the recipient thereof agrees to maintain the confidentiality of such information.

Quality computed using Bloomberg ratings methodology. Bloomberg ratings methodology reflects the ratings of Moody's, Fitch and S&P in such a way that if three different ratings exist for the same instrument the median rating is used; if two different ratings exist, the lower of the two is used and if only one rating exists, then that rating is used. If the debt instrument has not been rated by any of the three rating agencies, the security is classified as "Unrated."

An equivalent Long Term Rating is used in place of the Short Term Rating for relevant shorter duration ABS bonds for reporting purposes.

All non-performance portfolio data provided is based on a representative Jennison Active Long Credit Portfolio. The representative portfolio was selected because it is in the institutional composite and we believe the holdings, characteristics and risk profile are representative of this strategy. Representative portfolios are subject to change. Information is supplemental to the Active Long Credit Composite presentation. Please visit <https://www.jennison.com/global/en/institutional/gips/gips-active-long-credit-composite> for the Active Long Credit Composite presentation, which includes fee information and criteria for composite performance creation.

Excess return is the additional return generated by the composite relative to the benchmark.

Coupon – the annual interest rate paid on a bond, expressed as a percentage of the face value and paid from issue date until maturity. Coupons are usually referred to in terms of the coupon rate, which is the sum of coupons paid in a year divided by the face value of the bond in question.

Contribution to Duration (years) – found by multiplying the percentage that the individual issue or sector is of the portfolio by the duration of the individual issue or sector.

Duration - a measure of the sensitivity of the price of a bond or other debt instrument to a change in interest rates.

Effective Duration – a duration calculation for bonds that have embedded options. This measure of duration takes into account the fact that expected cash flows will fluctuate as interest rates change and is, therefore, a measure of risk.

Partial Duration – also known as Key Rate Duration. Key rate duration measures how the value of a debt security or a debt instrument portfolio, general bonds, changes at a specific maturity point along the entirety of the yield curve.

Maturity – the date on which the life of a transaction or financial instrument ends, after which it must either be renewed or it will cease to exist. The term is most commonly used in relation to bonds but is also used for deposits, currencies, interest rate and commodity swaps, options, loans, and other transactions.

Option Adjusted Spread (OAS) - the measurement of the spread of a fixed-income security rate and the risk-free rate of return, which is then adjusted to take into account an embedded option.

Yield – a general term that relates to the return on the capital you invest in a bond.

Yield to Worst (YTW) – a measure of the lowest possible yield that can be received on a bond that fully operates within the terms of its contract without defaulting.

Bloomberg US Credit Bond Index includes publicly issued U.S. corporate and specified foreign debentures and secured notes that meet the specified maturity, liquidity, and quality requirements. To qualify, bonds must be SEC-registered. The index includes both corporate and non-corporate sectors. The corporate sectors are Industrial, Utility, and Finance, which include both U.S. and non-U.S. corporations. The non-corporate sectors are Sovereign, Supranational, Foreign Agency, and Foreign Local Government.

Bloomberg US Long Credit Bond Index includes securities in the long maturity range of the US Credit Bond Index.
